

CHI-I HUANG (JASON)

Phone: +886 933 020145

Email: jasson15@gmail.com

Website: <http://jasson15.github.io>

Address: No.92, Futai St., Situn Dist., Taichung City 407, Taiwan

EDUCATION

National Taiwan University, Taipei, Taiwan

Sep 2009 - Jun 2013

- B.S. in Computer Science & Information Engineering
- Overall GPA: 3.79/4.0, Major GPA: 3.93/4.0
- Coursework: Machine Learning, Multimedia Analysis and Indexing, Data Structures and Algorithms, Cryptography, Compiler Design, Formal Languages and Automata Theory

Continuing Education, Online Certifications

Jan 2015 - Jul 2015

- *Mining Massive Datasets, Stanford University
- Introduction to Big Data with Apache Spark, University of California, Berkeley
- Design and Development of Games for Learning, Massachusetts Institute of Technology
- Gamification, University of Pennsylvania

*: Statement of Achievement with Distinction

WORK EXPERIENCE

Wavenet Tech Inc.

Feb 2015 - Present

Technical Lead

Taipei, Taiwan

- Led a 4-member team to pioneer edge-cutting Big Data technologies.
- Developed multi-threading web service for real-time bidding (RTB).
- Optimized NoSQL queries to suffice the requirement that 99% responses should be under 100ms with 1000 QPS.
- Optimized and maintained reporting system to calculate high dimension bidding insights from 10 million data per day.
- Deployed and maintained computation resources on Spark and Hadoop cluster.

Republic of China Air Force

Jun 2013 - May 2014

Orderly, Mandatory Military Service

Taiwan

- Provided group commander with private administrative and clerical aid.

InfoKeyVault Tech

Jul 2011 - Aug 2011

Programmer, Intern

Taipei, Taiwan

- Analyzed endurance of security USB tokens after executing encryptions and decryptions over 1,000,000+ times via Visual Studio
- Cooperated with electronic commerce company on a Java gift card system project

SELECTED PROJECTS

Crazy Fruit Market [link](#)

Apr 2015 - Jun 2015

Advanced Vocabulary Learning Game

- Crazy Fruit Market is a coursework of Design and Development of Games for Learning, MIT”.
- Facilitated the learning process of ESL learners for advanced English vocabularies.
- Built cross-device game by introducing Cocos2d game engine.
- Facilitated deployment process and environment setup by containerizing the project into Docker image.
- Built up a game development chain from scratch, including art design, educational material design and software engineering.
- Cocos2d, JavaScript, GIMP, Docker

Face Annotation [link](#)

Jul 2012 - Jun 2013

undergraduate project

- Face Annotation is a concurrent web-based tool for annotating data simultaneously.
- Provided 4,000+ facial data in Hao-Ting Chang’s master’s thesis, Context-augmented profile face attributes detection.
- Developed visual marker to mark face and eyes positions by dragging and dropping the markers.
- Documented the whole architecture and detailed programming guides on the project website, guiding site administrators to install, configure and customize their own facial data annotating website.
- HTML5, JavaScript, PHP, MySQL

Eventy

May 2012 - Dec 2012

Start-up

- Eventy was a social network service (SNS), which attracted nearly 200 users in 2 weeks.
- Activated Chinese indexing in search engine via Chinese segments algorithm within Coreseek.
- Achieved real time index update, which updates index in every 5 minutes.

Machine Learning

Nov 2012 - Jan 2013

Team Competition on Course

- Predicted with accuracy of 74.2% from 90,000 72-dimensional missing value data.
- Improved ranking from 46th to 37th by adapting new method to fill missing data via Amelia.
- Improved ranking from 37th to 30th by utilizing k-NN learning algorithm.
- Analyzed performance of several algorithms, such as LIBLINEAR, LIBSVM and k-NN.

SKILLS

- Programming: JavaScript, NoSQL, Spark, C, Java, Python, Docker
- Languages: English (fluent), Japanese (basic), Chinese (native)
- Standardized Tests: GRE(V160, Q167, AWA3.5), TOEFL(107), TOEIC (885)
